

HAMED AL-ABRI

Master's student in Cybersecurity at Epitech, work-study as R&D Cyber Engineering Apprentice at Neverhack (2026–2028)

About me

Originally from Oman, I have been studying in France since 2021. I hold a B.U.T in Networks & Telecommunications (Cybersecurity track) from IUT Colmar and I am now pursuing a Master's in Cybersecurity at Epitech as a work-study programme. My goal: to specialise in offensive security and purple teaming, from pentesting to attack simulation to strengthen detection.

Driving licence (B)

LANGUAGES

- French: B2
- English: Fluent
- Arabic: Native

IT SKILLS

- MS Office
- Python
- HTML / CSS
- Databases / SQL
- Asterisk telephony
- Cisco CCNA
- Advanced services (DNS, DHCP, Web...)
- Virtualization (VMware, VirtualBox)
- pfSense / Fortinet / Stormshield
- Active Directory
- Scapy, Nmap, Burp Suite
- Metasploit, Hashcat
- Docker
- LoRaWAN

PROFESSIONAL EXPERIENCE

Neverhack – Rennes (35)
R&D Cybersecurity Engineering Apprentice · 2026–2028

- Part of the R&D team, working on offensive cybersecurity development
- Work-study alongside my Master's in Cybersecurity at Epitech

Groupe Stihlé – Turckheim (68)
Network & Systems Apprentice · 2024–2026

- Created and managed user accounts for employees
- Led technical projects:
  - Deployed an LDAP directory
  - Configured a high-availability DHCP cluster
  - Designed and ran an internal phishing campaign for cybersecurity awareness

EDUCATION

2026 – 2028
Master's in Cybersecurity, Epitech (work-study)

2023 – 2026
B.U.T (Bachelor of Technology) in Networks & Telecommunications, Cybersecurity track, IUT Colmar (68). Degree obtained

2021 – 2023
DU PLUS
(Language, Academic and Scientific Preparation)
IUT du Limousin, Limoges (87)

2020 – 2021
General Education Diploma, equivalent to the French Scientific Baccalaureate
Azzan Bin Qais International School – Oman

PROJECTS

- **Internal phishing campaign**
  - Ran a cybersecurity awareness campaign (Gophish) and analysed the results
- **GLPI upgrade and optimisation**
  - Upgraded GLPI and improved ticket and IT asset management
- **Secure multi-site network**
  - Designed and secured a multi-site network (VLAN, routing, NAT, VRRP, MPLS-VPN, DNS/Web/Mail services)
